

INSTALLATION INSTRUCTIONS FOR MOBILE MARK "C" MOUNT IN 3/8" (9.5mm) OR 3/4" (19mm) HOLE

Drill a 3/8" (9.5mm) or 3/4" (19mm) hole in the car body at the desired location. Clean any burrs and paint from the area around the edge of the hole.

For a 3/4" (19mm) hole, route coax from the outside of the car through the hole. Tilt the mounting assembly at a slight angle and insert it into the hole.

For a 3/8" (9.5mm) hole, the assembly must be fed through the underside of the mounting surface. When mounting through a heavy wall material or a fiberglass body the stainless-steel saddle should be discarded.

Thread the retaining nut with the "O" ring in position on the stud. Tighten the retaining nut making sure the "O" ring becomes compressed enough for the retaining nut to come in contact with the mounting surface.

ATTENTION: Always wear safety glasses and follow the proper safety practices when installing this antenna.

Antenna Mounting

The best performance is always obtained by positioning the antenna at the center of the vehicle roof. Other options include a rear trunk deck or fender. These options do not provide optimum performance but may allow acceptable results.

Most antennas require a good ground plane for optimum performance. Poor ground planes and improper mounting position may cause less than optimum results.

WARRANTY

Mobile Mark, Inc. (Seller) warrants to Buyer that the products for a period of two years from the date of shipment will be free from defects of material and workmanship, and will be in accordance with specifications referred to herein. Seller's sole obligation under these warranties will be limited to either, at Seller's option and expense, repairing, or furnishing a replacement F.O.B.
